

# FLIR and Night Vision Australia launch new Scout II Thermal Cameras in Australia

By ASM on Mar 10, 2015 in Security Products, TechTime

Released at the recent SHOT Show, held in Las Vegas, FLIR SCOUT II Hand held Monoculars are now available in Australia.

FLIR's Australian Distributor [Night Vision Australia](#) (based in Sydney's CBD), carry a wide range of FLIR products as well as premium Night Vision equipment.

Night Vision Australia General Manager, John Overs, outlined the upgraded features of both SCOUT II units. Mr. Overs stated the primary feature change was that both units now offer a comprehensive 640x480px LCD Display Screen as a standard feature whilst the Scout II 320 has a video out capability, as well as an increased microbolometer resolution of 336x256px

"SCOUT II continues the FLIR tradition of producing a rugged and reliable design which incorporates both the 1 metre 'drop' and 30 minute 'immersion' standard ratings across all models" said Mr. Overs.

FLIR released two new Models at the SHOT Show, the SCOUT II 240 and SCOUT II 320

The entry level SCOUT II 240 provides the user with a handy 350 metre detection range aswell as three choices of palette (White Hot; Black Hot; InstAlert Red). Weighing just 340g this unit is the perfect pocket Thermal Monocular

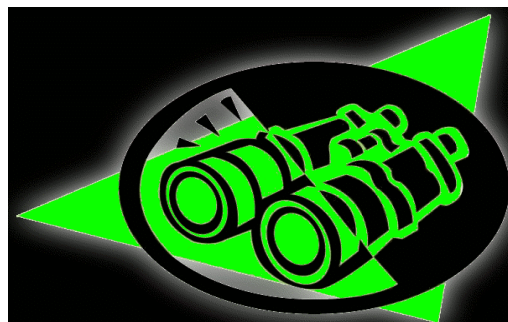

The SCOUT II 320 offers the user an incredible 550 metre detection range and a 2x zoom feature, useful for long distance detection of animals or intruders alike.
